AFTERNOON ENRICHMENT PROGRAM
for
TRANSITIONAL KINDERGARTEN CHILDREN
(12:30 pm – 3 pm)

Register for one or more favorite activity!
Flexibility is great, and we will be able to accommodate children MOST of the time. Should you wish to drop-in for an afternoon, please see an administrator to check for availability. If you choose to drop in on a swim day, we cannot guarantee that there will be space in the pool, in which case your child will stay back with another classroom.

*IF YOUR CHILD IS REGISTERED FULL-TIME, THERE IS NO ADDITIONAL CHARGE FOR THESE FUN ACTIVITIES

ASPIRING AUTHORS/ISRAELI IMMERSION
Monday
Children will learn about famous children’s authors, their lives and styles of writing. Engaging, child-centered activities will encourage them to become life-long readers and to develop a love for reading and being read to.

The Mandell JCC’s Shaliach, Tom Wainrich, will join the children every week with Israeli stories, songs, games, and other age-appropriate activities. Tom’s role is to bring Israel to the community through personal connections and Israeli-themed programs.

SUPER SWIMMING
Tuesday
Thirty minutes of safe & supervised free swim will keep your child’s swim progress moving forward throughout the year!

MOTION MANIA
Thursday
Through movement, children develop body awareness, coordination, flexibility and spatial awareness. Children will have an opportunity to build and expand these skills in an exciting yet non-competitive atmosphere. Children will experience movement through different mediums such as dance, yoga, games, strength training, stories and seasonal activities.

COOKING COUNTS
Wednesday
Combine nutrition and fun by creating an edible experience each week. The children will learn their way around the kitchen while making delicious and healthy recipes. While cooking, the children will also be developing their math, science and language skills.

POP, CRASH, WHIZ
Friday
Get ready for an afternoon of exploration and discovery. Children will explore both new and familiar concepts through observations, experiments, and hands on activities. Children will share their observations and ‘wonderings’ in cooperative groups and document experiments and discoveries through text, illustrations and diagrams.

Our experienced teachers lead challenging and fun programs rich in literacy, math, science and cultural history all within a relaxed and supportive environment. The mid-afternoon program also includes a short quiet time after lunch, center time and snack.

Plans subject to change
